Over 50 Years experience Specialists in products for:

- Windows
- Furniture
- Auto
- Home Decorating

We're Moheco Products, the custom metal working leaders since 1953. If you don't know our name, you know our products. Whether it's the trim on your car or the picture frame in your home, Moheco Products played a part in your life.

We serve a wide range of industries, from cars to construction; from windows to furniture and home decorating; creating and manufacturing quality metal parts that fit right and function perfectly.

We start with the best materials: Cold Rolled Steel, Hot-Dipped Galvanized Steel, Aluminum, Brass, Copper, and Stainless Steel;

strong, sturdy metals from light (.010) to heavy gauges (.080).

Then, through a process called Roll-Forming, we create quality, ruler-straight parts at high-production speed. Next, we punch, slot, and notch as needed. To finish the job, we can furnish a plastic peel off coating to protect the surface of the product.

Moheco also offers prefinished materials. Prefinishing puts the color or finish on the product before it is formed, saving extra handling, processing, and money. Using prefinished materials enables us to turn out finished products in just one operation.

Bring us your metal working needs and ideas. We'll make them happen.
